Ceiling

For Prefabricated Concrete Ceilings Universal Cut-Out

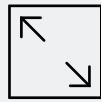

The Euroboxx Precast is a specially developed installation backbox for prefabricated modular ceilings, element ceilings and filigree ceilings. The acoustically optimized backbox for built-in loudspeakers can be integrated into the concrete slab right at the factory.

The Euroboxx Precast was designed so that the desired cut-out can be universally cut out after completion. This allows a flexible planning and a safe installation process.

Prefabricated Concrete Ceilings

Optimal handling in the production plant, optimized for the standardized workflow

Universal

After completion, the desired cut-out can be universally cut out.

Sound & Protection

Supports the sound quality of the built-in speaker, reduces airborne and structure-borne noise and protects the speaker against moisture

Smooth Workflows

The Euroboxx Precast easily fits into the workflow of concrete plants and other manufacturers of precast concrete walls and ceilings: Unlike with onsite concrete, these ceilings and walls are prefabricated in the factory and the backboxes are half set in concrete.

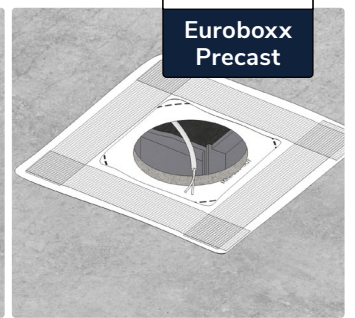

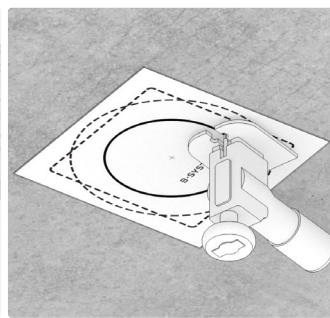

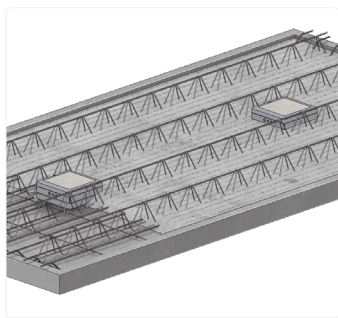

- ✓ Low weight and high stability
- ✓ Excellent vibration damping
- ✓ Powerful audio reproduction
- ✓ Strong air and structure-borne sound insulation
- ✓ Lateral break-out points for empty electrical conduits

Product	Volume	Dimensions	Cut-out Dimensions
Euroboxx Precast L	13.50 l	390 × 390 × 162.5 mm	circular: max. 330 mm square: 290 × 290 mm

B-System GmbH

Installation backboxes from B-System are standard solutions for the easy integration of loudspeakers and technology in concrete ceilings, brick or concrete walls and in drywall construction.

Our system architecture allows for a wide range of possibilities, even for demanding applications, and is suitable for all common loudspeaker brands and models.

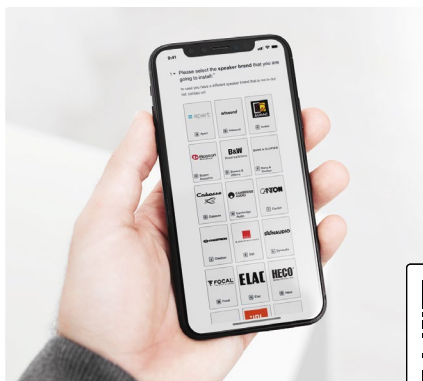

We use only high-quality and robust components. Our backboxes support the audio quality of all built-in speakers and protect the technology from dirt, moisture, dust and insects.

Our products have been in use thousands of times worldwide for years, the installation workflows are well-established and standardised.

Our customers and partners have access to numerous planning documents, data sheets and installation instructions.

The B-System team is happy to offer project based consultations!
